Term 2: October 2022

Our Christian value this term is: Thankfulness

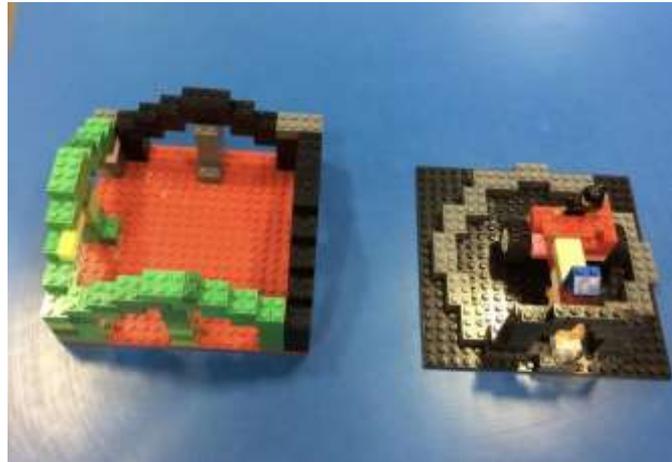

CELEBRATION WORSHIP AND AWARDS

Our fantastic Star of the Week and Mathletics awards during October. Congratulations!

KIDS WITH BRICKS (LEGO CLUB)

Lego club have had a great time this month creating Roman chariots and arches.

UP AND UNDER SPORTS

Can you spot who came to visit today? Yes! Mr Peters from Up and Under Sports. It was great to see him, though we really do enjoy Miss Cole's P.E lessons.

HARVEST FESTIVAL

EYFS painting some lovely pumpkins for our harvest festival at church this morning.

KS1 COTSWOLD MOTOR & TOY MUSEUM

Wren class had a great day at the Cotswold Motor and Toy Museum. We got to see lots of old cars and play with some great wooden toys.

WREN CLASS

At Forest School we made lavender bags and lavender play dough. A wonderful smell drifted through school. We were all very relaxed.

Wren class were looking at the material properties of cycle helmets and how they protect our skulls. We made protective cases for our eggs and dropped them from the upstairs window. Some did better than others. Though one was so well padded it survived the drop.

It was a bit wet this morning at forest school. We got on our coats, waterproofs and wellies and ventured out to gather fallen leaves. Then we made hedgehogs with the colourful leaves we had collected.

The Sound Collector, is a wonderful poem. Wren class worked together today to perform this. They acted out some great onomatopoeic words. Wren class have been loving their poetry. We went out to collect our own school sounds. We have written some fantastic poems. One very hard working year 2 made it rhyme as well!

Wren class were tasting apples. They voted for their favourite. Then drew a graph to show the results. Pink Lady won. What's your favourite apple?

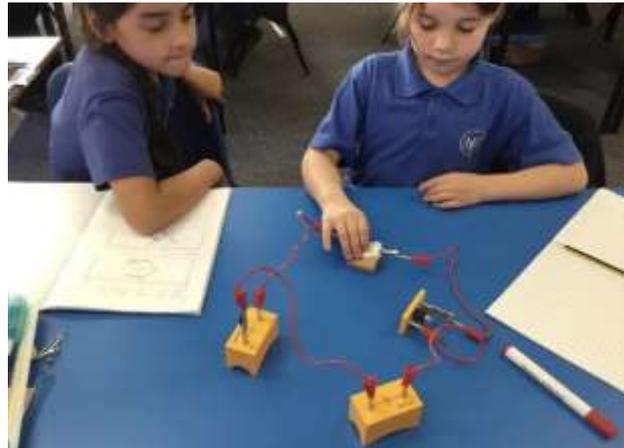

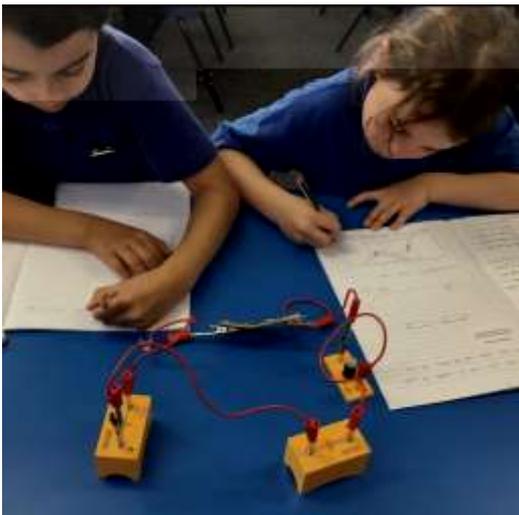

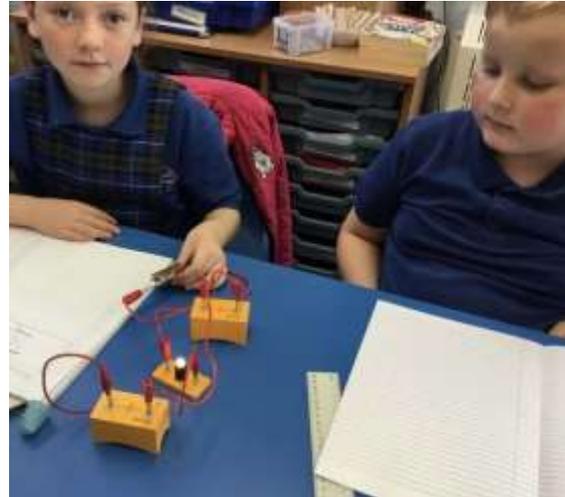

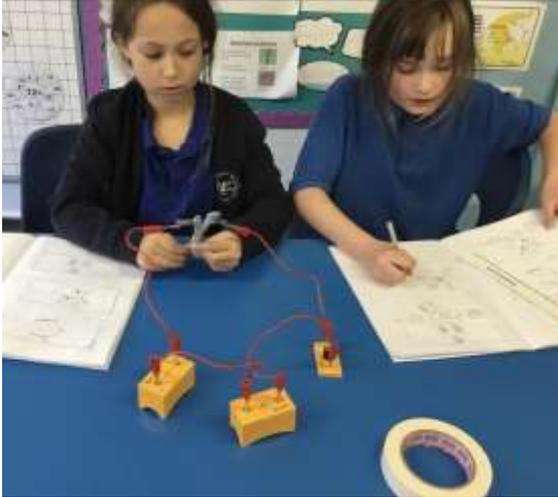

Another wet day at Forest School. We all got wrapped up and made autumn wreaths. The colours were great, we learnt some tree names. Oak, silver birch and field maple. We are very lucky to have so many different trees in our field.

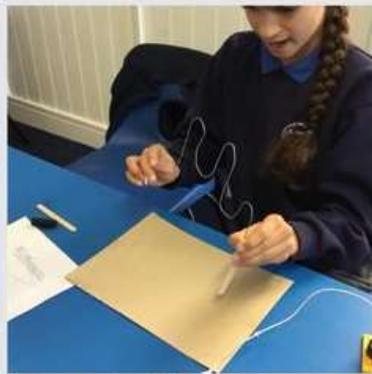

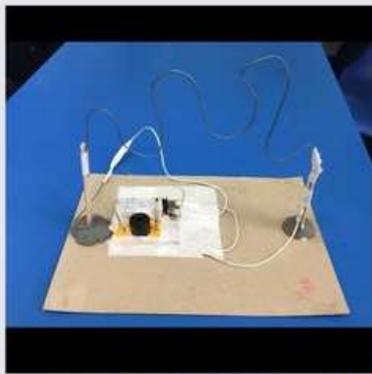

KINGFISHER CLASS

Kingfisher class were looking at how to make different switches so they could turn their light bulbs on and off. They were thinking about which materials have conductive properties so they could use them to complete their circuits.

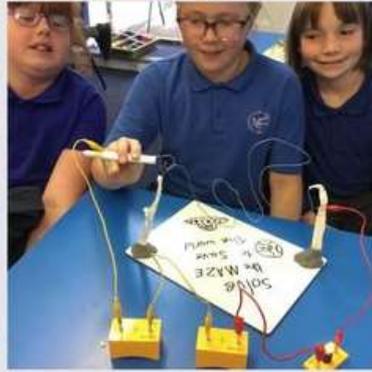

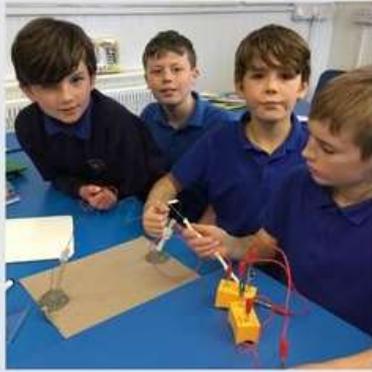

c

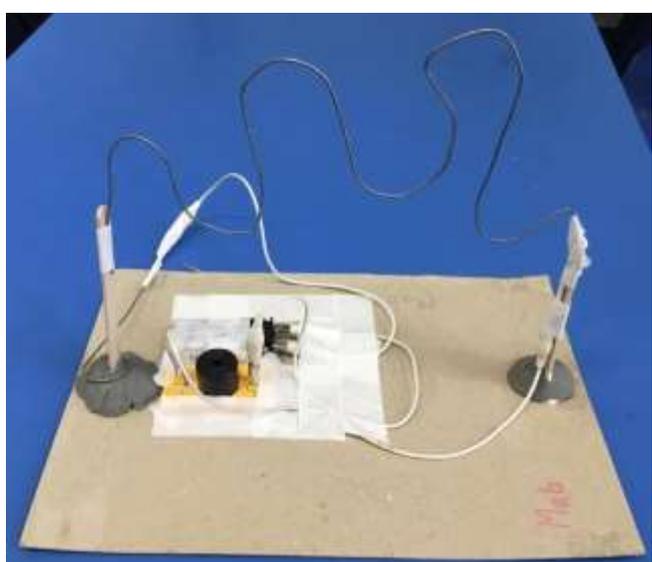

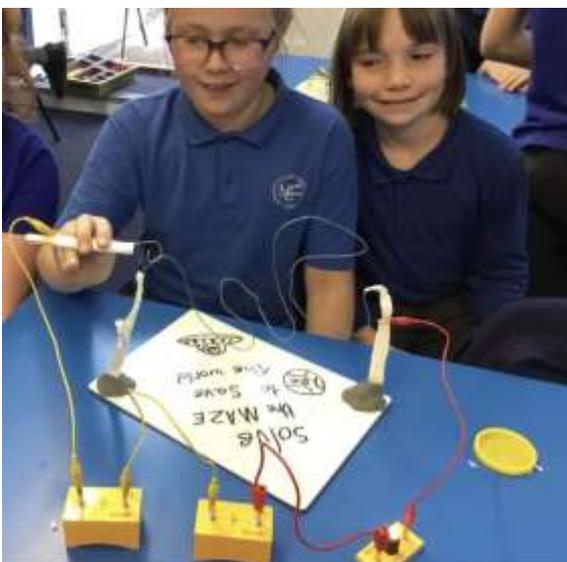

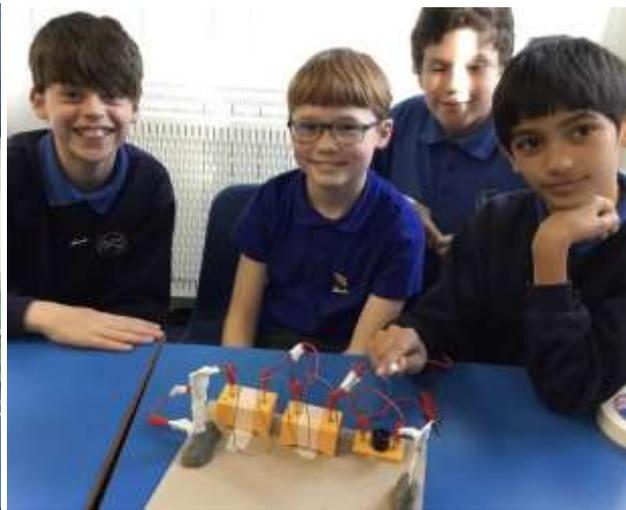

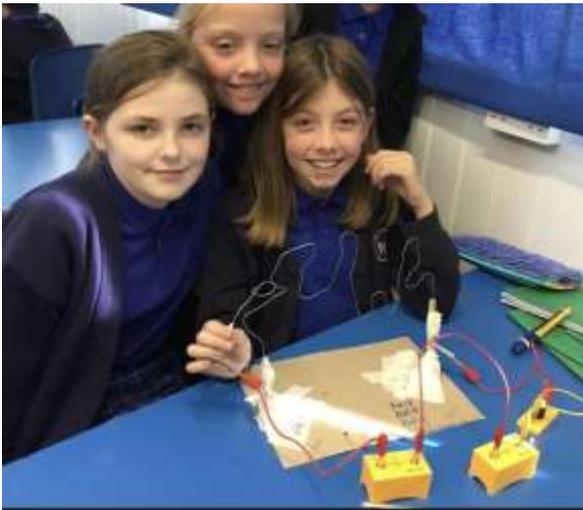

OWL CLASS

Owl class got to use their electricity knowledge to make their own buzz wire game. Could they complete the task without the buzzer going off? They had a great, noisy time.

Can you make your own buzz wire game? If you are in Owl class you can. They were great. Did they have a steady hand and get to the end without the buzzer going off?

Owl class were trying to work out what was wrong with the circuits. They took turns to make a non-working circuit and see if their partners could fix them. Can you spot what's wrong?
